

## Shape Sculptures

### Let's make a shape sculpture!

Geometric shapes are perfect and made of exact measurements, like squares, triangles, and circles. Organic shapes are irregular, like the leaves, seashells, fruits, and vegetables we find in nature. Many types of geometric and organic shapes surround you every day. Sometimes artists mix these types of shapes together. Want to give it a try?

### Materials

Pieces of cardboard  
Scissors  
Markers

1

Find some sturdy cardboard in your recycling bin.

2

Cut out some organic shapes from the cardboard.

3

Cut out some geometric shapes from the cardboard.

4

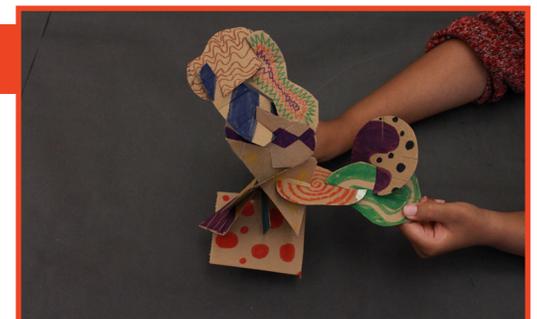

Decorate the shapes with the markers.

5

Cut two, three, or four slots into each shape.

6

Assemble the sculpture by sliding the slots together. Wow! Good work!
