

Moveable Mural Wall

Let's make a moveable mural wall!

Mural artists take something boring like a plain brick wall and transform it into a beautiful work of art that many people can enjoy. Murals can transform the look and feel of a space. An old warehouse can appear to be a palace, or an office wall can look like the circus! Do you have a space that could use a mural? What if you could move a mural from place to place to transform lots of spaces?

Materials

Large cardboard box
Scissors
Markers

1

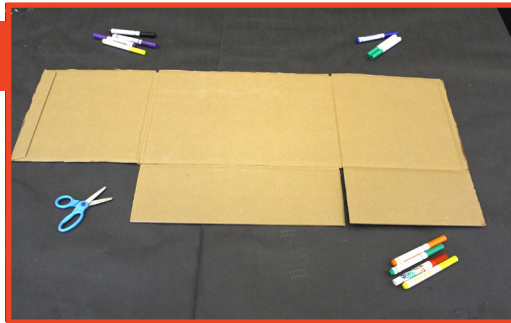

Cut away one side of the box so that it has only three sides.

2

Remove some or all of the flaps to turn the box into a wall.

3

Lay the cardboard box on the floor. Imagine a special place you would like to create with your mural.

4

Use a marker to draw this place. Don't worry about small details.

5

Color in your mural with markers. Add details, if you'd like.

6

Take your moveable mural wall into a room and stand it up. What a nice transformation!
